

9×19, 5.56×45, 7.62×51, 12.7×99 Tracer Ammunition

Ensure greater performance and the best concealment of the shooter with RUAG NATO Tracer

Together
ahead. **RUAG**

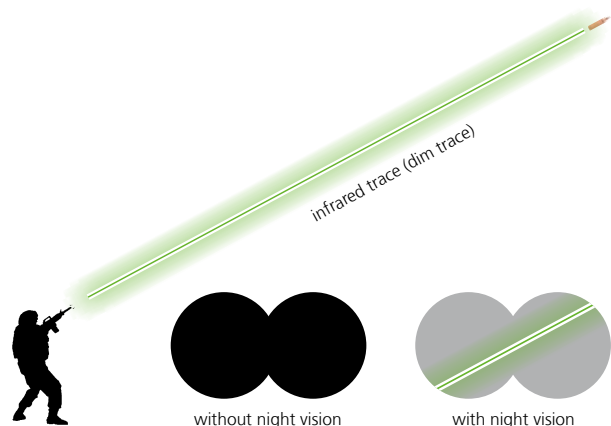

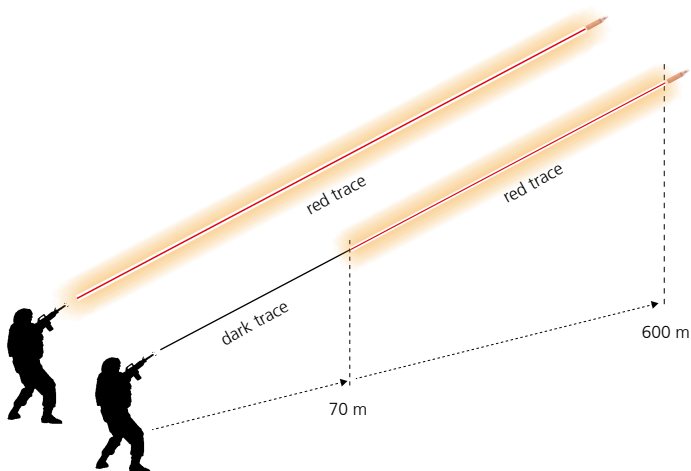

Keeping on target.

Shooters can fully depend on our tracers in following the tracer trail to increase the aiming efficiency.

- Fully compliant with any military specifications
- Completing a full product range
- German engineering, 100% RUAG production
- Designed to NATO Standards
- Dependable under extreme climatic conditions
- In service with numerous Armed Forces

3 Types of Tracer Ammunition

- Red Tracer: The RUAG standard carries a Red Tracer Charge.
- Dark Tracer: To conceal the shooter's position, the tracer charge becomes only visible after travelling a certain distance away from the muzzle.
- IR Tracer/Dim Tracer: To prevent the tracers from being detected by the naked eye, these charges are spotted exclusively in the infrared range only.
