

RUAG M109 SOLUTION

Proven technology. Highest performance.

Together
ahead. **RUAG**

“Its simple and intuitive handling gives you instant availability.”

André Müller
Product Manager Artillery
RUAG Defence

Maximum performance thanks to many years of M109 expertise. We know exactly what is important in an emergency. That is why the RUAG M109 Solution is the most cost efficient and leading player with the most reliable technology.

RUAG M109 Self Propelled Howitzer

The best decision for your artillery: proven for decades, technologically up-to-date and extremely appealing when it comes to cost.

RUAG M109 MRO/ Upgrade

Modernise your M109 inventory with the latest technology, such as improved firepower and open communication. Individual and modular.

RUAG M109 Simulation & Training

With the Crew Training Simulator (CTS) and video-assisted training programme (VAT), you can train effectively and quickly. Because your crew's knowledge is crucial when every second counts.

We understand your operational requirements. Thanks to our many years of experience.

Maximum performance. Easy handling.

RUAG M109 Solution impresses users with well proven and comprehensive technology and open communication interfaces. Ergonomically designed for quick and intuitive handling.

Unexpected surprises. Instant availability.

Unexpected events require immediate availability. Fast MRO service coupled with the latest and reliable electronics, ensure your mission success. Fast and uncompromising. Proven technology. Also tomorrow.

Modular technology. At an attractive price.

We know what is important in an emergency. Your own individual emergency. Thanks to our modular principle you can upgrade only what you need. M109 High Performance at an attractive price.

Improved firepower. Used intelligently.

Top performance of the M109 in missions: More than 40 km range. Whether with steel or the latest smart ammunition. Three shot in just 15 seconds. RUAG M109 Solution; we know exactly what you need.

RUAG M109 Self Propelled Howitzer

“You improve your artillery.
Efficiently and cost effectively.”

Walter Akerman
Product Development Artillery
RUAG Defence

Based on the M109 system that has proven reliable for decades. Individual and modular with the latest technology. Through the intuitive technology that has been deliberately kept simple, we ensure high availability and fast training. This makes the M109 highly attractive – not just for your budget.

RUAG M109 MRO / Upgrade

“You decide which is the right upgrade for you.”

Christoph Hebeisen
Senior Sales Director ME
RUAG Defence

High, advanced performance with proven technology. Because our design is modular, we can modernise each M109 model individually and cost effectively. With our integrated logistics support (ILS) you can keep a constant eye on the life cycle costs. This means you can optimise your expenditure for materials management, maintenance and infrastructure. You can't get more transparent than this.

RUAG M109 Simulation & Training

Intuitive know-how.
Effective on-site training.

High operational readiness through integrated on-site training and simulations. Thanks to the Crew Training Simulator (CTS) and video-assisted training programme (VAT), you can train effectively and quickly. Because your crew's knowledge is crucial when every second counts.

We provide world class training systems that support customers in improving their skills at a lower cost with reduced risks and we add value through our holistic training approach. Our integrated logistics support (ILS) includes a wide array of educational material and teaching aids.
