

# RUAG Vehicle Protection

## SidePRO-KE/IED

SidePRO-KE/IED as solution for wheeled vehicles

Blast trials with artillery grenade

### Description

SidePRO-KE/IED is a polyvalent composite protection system. The patented production process enables the system to counter AP-projectiles, IED, artillery fragments and EFPs with a minimum thickness.

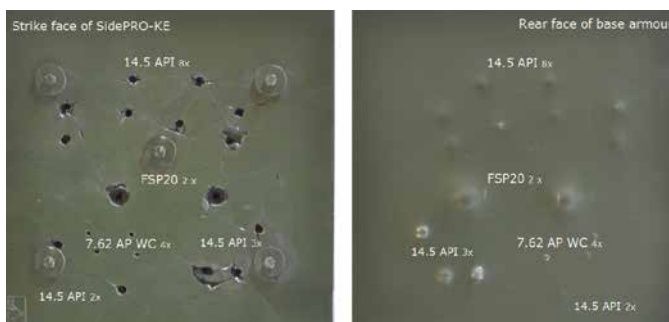

### Protection technology

Composite add on protection for armoured platforms

Passive armour against KE, IED and EFP threats

### Ballistic verification

- Up to 14.5x114 API B32
- High speed IED fragments
- Blast

### Technical characteristics

For base armour 7 mm upwards

Adaptable to any contour and shape

Multi-hit capability exceeds international standards

Low thickness enables integration behind tracks and wheels
